

Translating and combining images 2

Have a go

1 How many of each of these shapes are hidden in the picture on the right? Write the number next to each shape. Only count the shapes that are **not** rotated.

In the next two questions, the shape on the left is hidden in one of the pictures on the right. Find it and colour it in. The shapes are **not** rotated.

Marking or shading the shapes as you find them can be helpful.

Test yourself

The small shape on the left can be found in one of the pictures on the right. It might be made up of one or more pieces. Circle the letter beneath the correct answer. For example:

Score / 4

Try it out

Use a ruler to draw **eight** straight lines inside this rectangle so that the L-shape on the left is hidden within it. Ask a friend or parent to try to find the hidden L-shape.
